NEW Space Painting Tutorial Series by Dr Chee Ming Wong – plus more!

EDITORIAL

Welcome to Issue 031! Well, we're officially halfway through 2008 now, and *seriously* questioning where the time goes these days as we get stuck into the serious work on your August issue already! So before we wake up to Christmas bells ringing in the morning, let me quickly mention some of this month's highlights so you can get stuck in!

First of all, I can't help but excitedly tell you about our brand new Space Painting Tutorial Series by the we-can't-believe-he-has-time-to-write-tutorials-for-us busy Dr. Chee Ming Wong [PAGE 101]. Chee actually called me up not too long ago to ask me if he had any limitations as to what he could write for this tutorial, as he loves to get into the theory and talk about the details in depth, and as soon as we heard this we got *really* excited and simply couldn't wait to see the finished draft... which we proudly feature in this magazine – just for you! Chee certainly impresses us all with this first tutorial instalment, and I am proud to announce that this tutorial series will in fact be running for this and the next 11 months! Yep, that's right: a 12-month tutorial series all about space art creation – so get your space hats on, pick up your Wacom and get painting! We all expect to see some wonderful space creations this time next year, so no excuses – get stuck in and learn from the Master, exclusively in 2DArtist mag!

Our must-see interview this month is with ArenaNet Concept Artist, Rich Anderson, aka "FlapTraps" [PAGE 041]. We find out where the nickname "FlapTraps" originated from, all about his work environment and his inspirations... and how he has developed the trick of using the eraser in Photoshop to enhance his awe-inspiring artworks! This interview is pretty much packed with *all* the kind of stuff that great interviews are made of, and because we love his work so much we've given plenty of his images full-page spreads to really get the creative juices flowing in all of you. So enjoy Rich's offerings and don't say I didn't warn you about that inspiration thing – you'll be diving on that Wacom in no time, trust me!

We've actually taken a 'politically correct' stance on our interviews this month, with equal measures of interview goodness from the guys and gals. There's plenty in this issue for all and everyone, so get reading before the August issue comes out and you run out of time! *winks*

We've heard that a lot actually: that we put so much content in our mags that it's actually hard to get through the whole issue – cover to cover – in just a month! Well, we take that as a compliment as we're not likely to stop providing the packed content anytime soon, so enjoy the latest instalment from the 2DArtist team and feel free to let us know what you think! **ED.**

Get the most out of your Magazine!

If you're having problems viewing the double-page spreads that we feature in this magazine, follow this handy little guide on how to set up your PDF reader!

SETTING UP YOUR PDF READER

For optimum viewing of the magazine, it is recommended that you have the latest Acrobat Reader installed.

You can download it for free, here: [DOWNLOAD!](#)

To view the many double-page spreads featured in 2D Artist magazine, you can set the reader to display 'two-up', which will show double-page spreads as one large landscape image:

1. Open the magazine in Reader;
2. Go to the **VIEW** menu, then **PAGE DISPLAY**;
3. Select **TWO-UP CONTINUOUS**, making sure that **SHOW COVER PAGE** is also selected.

CONTRIBUTING ARTISTS

Every month, many creatives and artists around the world contribute to 3DCreative & 2DArtist Magazines. Here you can read all about them! If you would like to be a part of 3DCreative or 2DArtist Magazines, please contact: lynette@zoopublishing.com

Kirsi Salonen

is a concept artist, writer and illustrator from Finland, who's based her passion for art strongly around the fantasy genre. She uses only 2D software to create visually strong atmospheres, to tell stories through various sets of emotive characters.

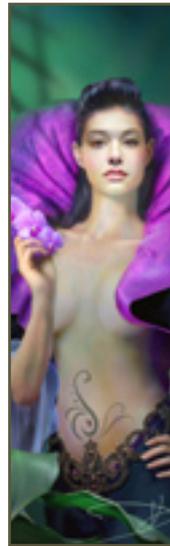

<http://www.kirsisalonen.com/>
salonen.kirsi@gmail.com

Gerhard Mozsi

is an Australian artist who has worked both remotely and on-site for studios in the USA, Austria, Germany, Australia, and the UK. He studied traditional art at university before exchanging the paintbrush for a Wacom, and now works primarily in the digital medium. He has been working as a concept artist and matte painter for film and games development for the last 5 years, and his work can be seen on his website and blog.

<http://www.gerhardmozsi.com/>
contact@gerhardmozsi.com

Drazenka Kimpel

is a Florida-based Illustrator and Graphic Designer with over 9 years of experience in the digital medium. She is currently employed full-time with Magicgate Software Inc. and is open to commissions in many fields of illustration and design.

Jeff Haynie

has worked as an Art Director and Concept Artist for companies like DreamWorks Interactive, EA Games and

THQ on games such as Medal of Honor, Need for Speed Hot Pursuit 2, Clive Barker's Undying and Evil Dead Regeneration. As an illustrator his client list includes Disney, Pixar, Warner Brothers, American Airlines, Texas Instruments, Pepsi-cola, and Frito-lay. Jeff is currently an Art Director at Big Fish Games. <http://www.jeffhaynie.com>
j.haynie@comcast.net

Dr. CM. Wong

has over 8 years of creative visualisation and pre-production experience, having worked on various independent game

projects, publications and CGI pre-production artwork. He is currently the CEO of his own digital art studio, Opus Artz, based in London. Previous work includes his role as Senior Concept Artist and Visual Lead for 'Infinity: The Quest for Earth MMO 2009', plus numerous commercial publications. <http://www.opusartz.com>
chee@opusartz.com

Robin Olausson

is a 22 year old freelance concept artist/illustrator from the South of Sweden. He's a highly motivated, self-educated person

who always love new challenges. In the future he hopes to get work in the games industry, publish his own comics, and become one of the top designers and illustrators!
<http://www.robin.reign.se/gallery>
<http://www.ewkn.deviantart.com>
tv1000@spray.se

Serg.8

was born in St. Petersburg, Russia, and moved to the United States when he was about ten. He has studied illustration, fine art and design

at various institutions and now works as a concept artist for the video game/film industry. He's currently with Interplay working on Fallout Online. In his spare time he has started a forum to educate and discover new Visual Development artists in So.Cal. <http://deadlinestudios.com>
sergdl8@gmail.com

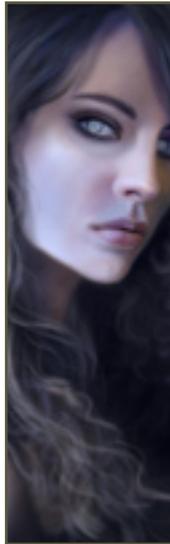

Bente Schlich

is a German freelancer and art student from Germany. She is an illustrator for books who would also like to work as a concept artist for games and movies in the future. Her main inspiration comes from legends, myths and poems.

<http://www.creativesoul.de>
webmaster@creativesoul.de

Mike Corriero

currently produces assets as a freelance Artist for various companies, including everything from creatures, environments and structures, to illustrations and icons. Some of his clients include Radical Entertainment, ImagineFX and Liquid Development, to which he has contributed work for projects delivered to Flagship Studios and Ensemble Studios through the art direction and outsourcing of LD.

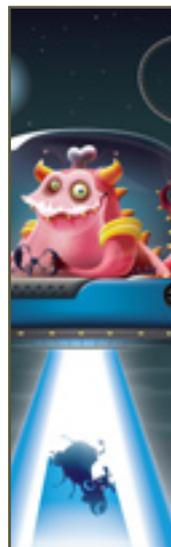

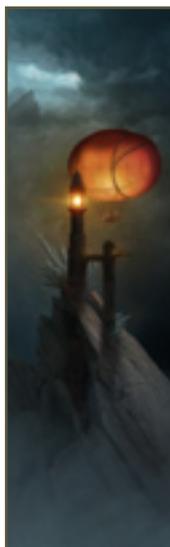

<http://www.mikecorriero.com>
mikecorriero@gmail.com

Andrew Berends

is a Concept Artist/Multimedia Designer living in Melbourne, Australia, working freelance on everything from web and print design to creature design, character design and matte painting. He also works in 3D and motion graphics, but his passion is for pre-production and post-production in the entertainment industry, and he's always on the lookout for any open position that would lead to such work!

<http://www.hawkfishmedia.com.au>
aberends@hawkfishmedia.com.au

Rodny Mella

is from the Philippines and is currently working as a Product Designer and freelance Artist/ Illustrator in Hong Kong and Shenzhen, China. His background is in art advertising, but for the past 8 years he's been doing product designing professionally, and previously worked as a game designer for 2 years at Micronet, Japan. He enjoys digital painting and 3D modelling and animation.

<http://www.rodnymella.com>
gigsmella@hotmail.com

Kerem Beyit

was born in Ankara, Turkey, and started drawing in his early childhood after being inspired by comic books. At Gazi University, he studied graphic design for 4 years. He doesn't have any formal training for illustration; he trained himself and his teachers have been the great fantasy artists, like Frazetta and Brom. He's worked for various places doing graphic and illustration works, book covers, local comics, magazines and children's books. <http://kerembeyit.gfxartist.com/>
kerembeyit@hotmail.com

Patri Balanovsky

Is a Production/Concept Artist at PitchiPoy Animation Studios, Tel-Aviv, in Israel. He's been drawing & painting since he can remember; creating characters, creatures & fantastic scenes has always been a passion of his. Telling a whole story through a single image can be quite a challenge, but he's always up for it! Keeping his work fresh & versatile, he explores all sorts of genres, styles & attitudes.

START YOUR STORY

The Programs

All Animation & Visual Effects programs at Vancouver Film School focus on telling a great story through movement. Choose your discipline: **3D Animation & Visual Effects**, **Classical Animation** or **Digital Character Animation**.

The Leader

The Animation & Visual Effects programs at VFS are led by industry veteran Larry Bafia, who was Animation Supervisor at PDI/Dreamworks and worked on hits like *Antz* and *Mission Impossible II*.

The Process

Under the guidance of industry pioneers, you will work and learn in a studio setting, and create a demo reel or film of your own. When you graduate, you're ready to work in a production team.

The Results

VFS animation is all around you. Every year our graduates start careers at the world's best production studios. You've seen their work in *Iron Man*, *Transformers*, *Cloverfield*, *The Golden Compass*, *Horton Hears a Who*, *Lost*, *Family Guy* and *Battlestar Galactica*.

VFS student work by Zack Mathew

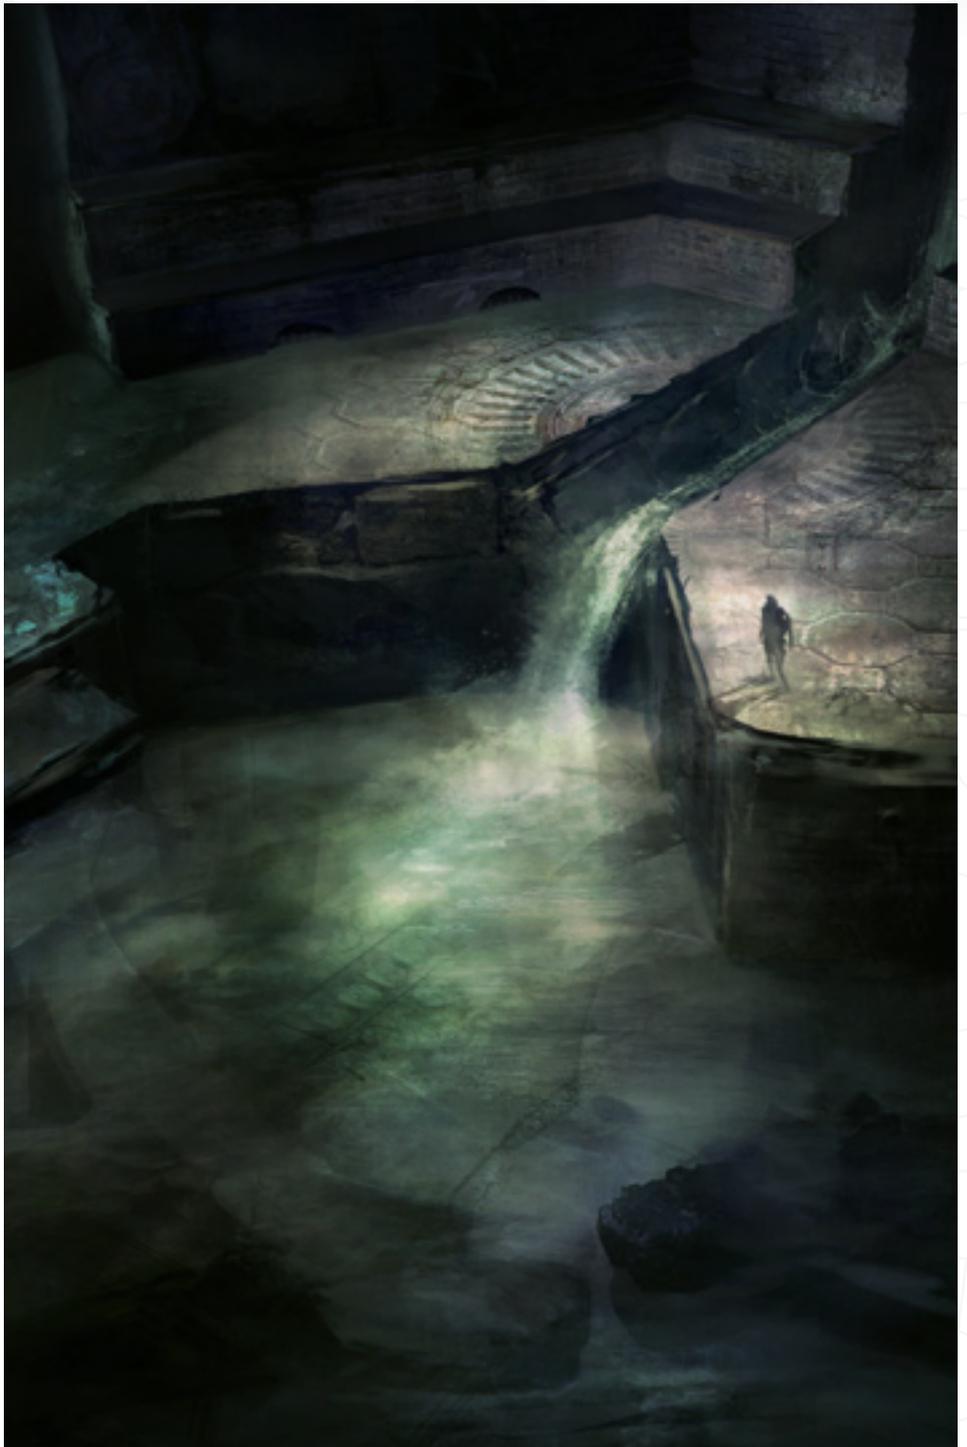

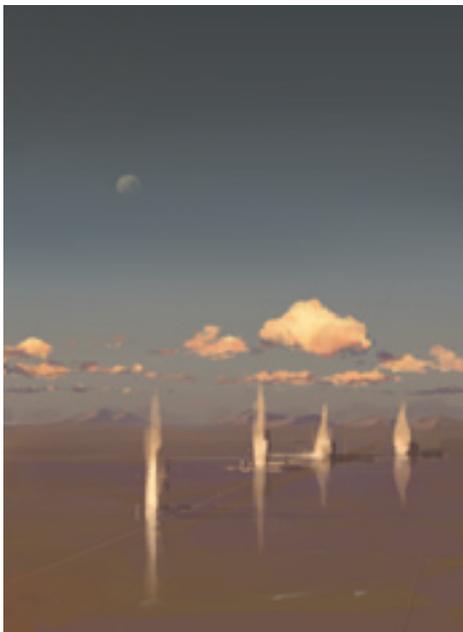

"THE THING THAT MAKES WORKING DIGITALLY SO SPECIAL AND DIFFERENT FROM TRADITIONAL ART, IS THAT IT ALLOWS YOU TO DO THINGS THAT JUST CAN'T BE DONE ON PAPER OR CANVAS (OR WHATEVER SURFACE)."

Gerhard Mozsi is a concept artist and matte painter living in Germany, who has worked in the entertainment industry for four years now. Having originally trained as a traditional artist, he has worked principally as an environment artist and also enjoys exploring the digital medium.

GERHARD MOZSI

Your blog states that you have worked in the entertainment industry for the last four years. How did you come to be a matte / concept artist and what path did you follow to arrive at where you are now?

The process really started in 2001. It was quite simple; I was working as a waiter at the time, doing a lunch shift, and I happened to recognise one of the customers. She was the sister of a good mate of mine, who I hadn't seen in years. We got talking and she told me that he was working as a concept artist in the film industry, in Australia. This was a revelation. I didn't realise that this was possible in Australia. So I got his number, we met, and I decided that's what I wanted to do. From then on it was a series of lessons in commitment. At the time I was in my last year of my BA - and that had to go so that I could commit myself fully to studying art full-time. During the day I would be at school studying traditional art disciplines (painting, drawing etc), then at night I would play on the computer, exploring digital art. This went on for

years, until I started to get paid art jobs. I didn't care what the jobs were, as long as I could draw and get paid. I did some awful work; weird Santa Christmas stuff and nasty chocolate promotional art, but it eventually led me to getting enough experience and production work together that I could create a decent website, with which I could apply for full-time work. I finally got a full time position as a concept artist at THQ Studio, Australia and it has all progressed from there.

You often hear people talk about the importance of their first career job. What proved to be the main benefits of the job at THQ and what key lessons did you learn there?

There is definitely a certain importance to your first "full-time" industry job. I think the emphasis has to be on "full-time". Irrespective of the company, I believe it was important to get all those hours done. It was simply a case of painting for hours and hours, under pressure.

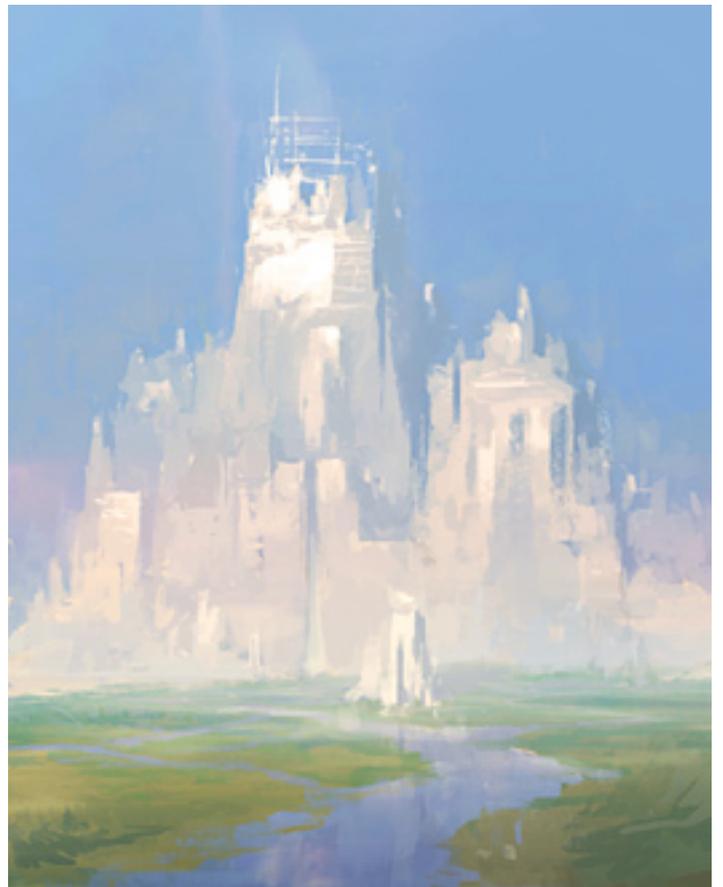

That was the main benefit. It forced me to work very hard, with a specific focus, and continually have my work reviewed.

My two years at THQ allowed me to develop as an artist. It gave me time to explore, to experiment and expose my work to my peers. Unfortunately I was the only concept artist there (the concept guy that was there when I started, left after six weeks of me arriving), so I couldn't learn off another more experienced artist. I was forced to work a lot of stuff out myself. That wasn't ideal, as I am a big believer in mentoring new staff, especially when they were as green as me. But it meant I had to learn quickly and work hard. It enforced a discipline and a sound work ethic.

Many of your pieces show the human element in an almost incidental aspect - quite small and almost insignificant within the scene. What reasoning can you attribute to this?

That's a technique to show scale. The tiny specks (people) provide scale for the viewer, as well as a subconscious link to the image, making it less impersonal (or so I hope). I have an intense fascination with scale and epic landscapes. When I first saw the work of John Harris, I was sold. I suppose at the moment I am more interested in "place" than the "person", hence a lot of environmental work. Also, I have principally been employed as an environmental artist, so painting environments is a bit of a habit.

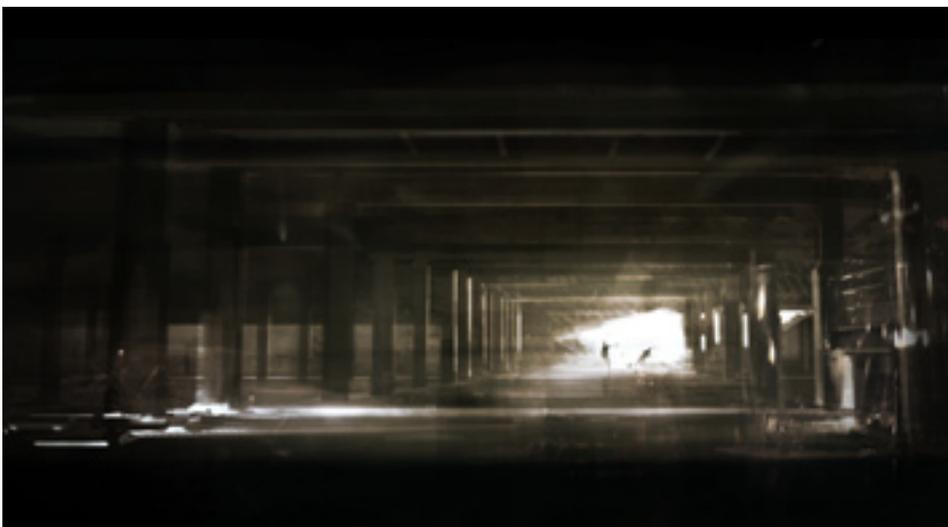

Which software do you use and what have been the most useful aspects of working digitally, with regards to the numerous tools on offer?

Photoshop. That's all I use generally. At times I use Maya or Modo to create basic architecture for environments. I have tried a variety of other applications, but I have found they are not as robust or as versatile as PS. I especially love Bridge; using PS with Bridge is a treat, especially when working with a lot of photos. The digital medium means I get to play around a lot; I get to explore ideas quickly and try a whole lot of stuff out. I basically get to explore my options. PS is great as it's a fast and stable application and well suited to working with photos (as its name suggests!)

There seems to be an apocalyptic theme running through some of your production art. What is the story behind these images?

The apocalyptic theme is a result of me getting "known" for doing these types of images. Jobs would come along, with clients stating they liked an image of a bombed out city I did, and if I could do another one for them. So its market driven really, sort of being "typecast" I guess. But I do enjoy the theme. The post apocalyptic theme has, I believe, a resonance with all of us. For years we have been bombarded with imagery of "unspecified" countries bombing the living crap out of other "unspecified" countries. This is powerful stuff, and it seeps in. For me it has a fascinating aesthetic - perhaps my own

fears of what's happening in the world today. That, or simply watching too many movies and playing too many games.

What do you feel are the key lessons you could teach newcomers to the digital medium?

A key lesson is understanding the versatility of the digital medium; the production processes are so multifaceted that you should not lock yourself into any one way of doing things. There are so many options and avenues to explore. The thing that makes working digitally so special and different from traditional art is that it allows

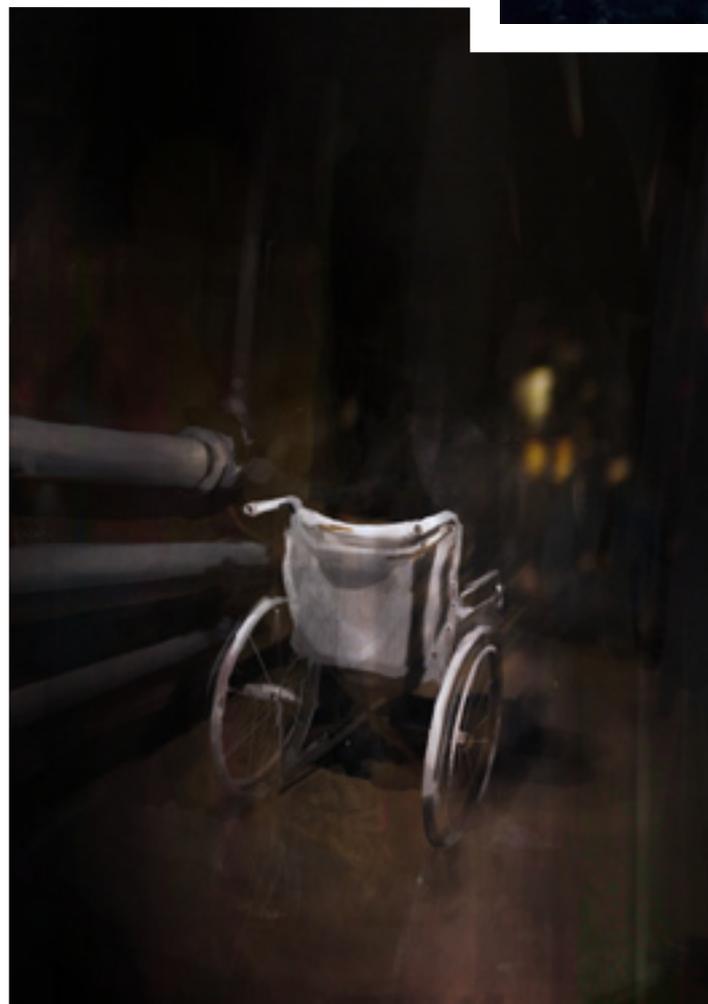

you to do things that just can't be done on paper or canvas (or whatever surface). Such as working effectively with photos and never really being able to ruin a piece, as you can always revert to an old file. However, I also believe it's important to get a grounding in traditional art practice. It teaches you the discipline of art. It's easy to get lost in 'tricks' working digitally. I believe all students of art need to learn, for instance, the pain and joy of working with gouache, or even simply learning how to mix colours. This teaches patience and discipline. After knowing how to work with a variety of traditional mediums, learning digital painting applications is comparatively simple.

On the subject of lessons, in which areas do you feel you have developed and improved most as an artist over the last few years - particularly in respect to your digital work?

I would like to think there's been a general

improvement in all aspects of my art. A deepening maturity, I would hope. But that's for others to decide really. I am certainly faster than when I first started. My own pipeline for digital work is pretty tight. Over the years I have amassed a huge digital image library and developed a sound methodology for researching new projects and briefs. I also have a greater technical understanding of a whole bunch of applications, and how to best exploit them - but all that just comes with time.

You integrate photographic elements in your work. Do you see this as a kind of tether to reality?

I suppose I started to answer this in a previous question. To me, the digital medium is a thing in its own right. While making sure that I maintain core traditional art principles when painting digitally, I also want to explore the digital medium as a separate entity. In my present understanding of digital media, using photos reflects this. It represents a hybrid approach; an integration of painting and photography. Something quite different from a photo montage or a straight painting. It's something that just can't be done as effectively in the traditional art realm.

This is all new to the world, it really hasn't been around for too long, so I am just exploring what can and can't be done. As for a tether to reality, I suppose it can be seen that way. Photos certainly provide a realistic feel to the work. They can infuse tremendous amounts of detail and light information. I don't want realism (unless it's for work and it's a matte) in

my personal work, I want a blend. I guess I am still trying to develop and define what all this actually is.

With regard to using photographic elements, how challenging has matte painting been in comparison to the more painterly concept projects?

Matte painting is bloody hard. To paint a realistic picture is difficult. I look at the work of Dusso in awe, especially those mattes for the last *Star Wars* film. Those mattes that Dusso did are just incredible. That's hard, seriously hard work. On top of that it's stressful, as it's easy to see when a matte isn't working - it just doesn't look real.

You have to be a confident painter, and know your stuff very well to do quality mattes.

I find mattes very hard and demanding. I would like to think they are getting easier, but it's just not the case. Each one is a new challenge.

From that perspective, painterly concept projects are not as demanding.

Painterly concepts are more relaxed. To begin with, painterly concepts hardly ever go into production - they are generally for internal use.

A matte will be seen on a screen or in game so there is a greater performance pressure.

So they are quite different, and a matte is certainly more challenging, from both a technical and psychological level.

And finally, if you could travel back in time to learn from one painter or artist who would it be and why?

Well that's a tricky one as there are a whole bunch. I think it would be great to simply be apprenticed, as an artist was "back in the day". When it was seen almost as a trade, where you learnt the skills of art-making over many years, while under the tutelage of a great master. But back to question. I would love to meet and learn from Peder Severin Kroyer. He was a great and accomplished artist but his work, to me, maintains such a warmth and intimacy. I guess that can't be taught, as that was his "art". I would simply love to learn and work with someone that inspired and who could capture such love in their work.

THE CHALLENGE
 Welcome to the Stylised Challenge! Each month we will select a challenge and invite everyone to participate. All participants will be invited to create a stylized illustration of the challenge. The winner will be chosen from a panel of 2D and 3D Artists to have their artwork featured in our magazine. Each month we will also have a "losing 0/1" from the month before that.

WHAT ARE WE LOOKING FOR?
 There are no restrictions on the style or medium used for the challenge. We are looking for creative and original illustrations. The challenge is open to all artists and we encourage everyone to participate.

Welcome to the Speed Painting section of the magazine. This month we've asked two artists to produce a speed painting based on a simple, one-line brief. Here we feature the final paintings and the overview of the creation processes.

This month our talented artists, Robin Olausson and Serg S, tackle the topic:

**ONCE A THRIVING CITY
NOW DESERTED AND
TAKEN OVER
BY VEGETATION**

Are you using the right tool for your 3D environments?

Vue is used by leading production facilities around the world (ILM, Sony Pictures Imageworks, Weta Digital, Dreamworks, Electronic Arts, Ubisoft... to name but a few).

Vue 6 xStream – the integrated solution. Create and edit extremely rich and realistic natural environments directly within 3DS Max, Maya, XSI, Lightwave & Cinema 4D, and seamlessly blend them with native scenes and animations.

Vue 6 Infinite – the stand-alone solution – offers a high-end 3D scenery solution for all CG professionals. It is strongly focused on advanced animation and integration tools, productivity, flexibility and inter-operability with existing toolkits.

Start using today the tools you'll need tomorrow with the FREE Personal Learning Edition:

ANIMATION MENTOR.COM

The Online Animation School™

"Getting to spend my day creating performances and bringing characters to life is so incredibly awesome, and I can't believe I get to work on such a cool project straight out of school. I'm so glad I had the opportunity to learn character animation in such a challenging and supportive environment."

- **Aja Bogdanoff**

*Animation Mentor Graduate
Blue Sky Studios*

"There is no better motivator than knowing that your work can be seen by more than 600 people each week, including some of the best animators in the industry. This, paired with the contagious enthusiasm of my classmates, the mentors and the Animation Mentor staff pushed me to always do my best work!"

- **Mike Stern**

*Animation Mentor Graduate
DreamWorks Feature Animation*

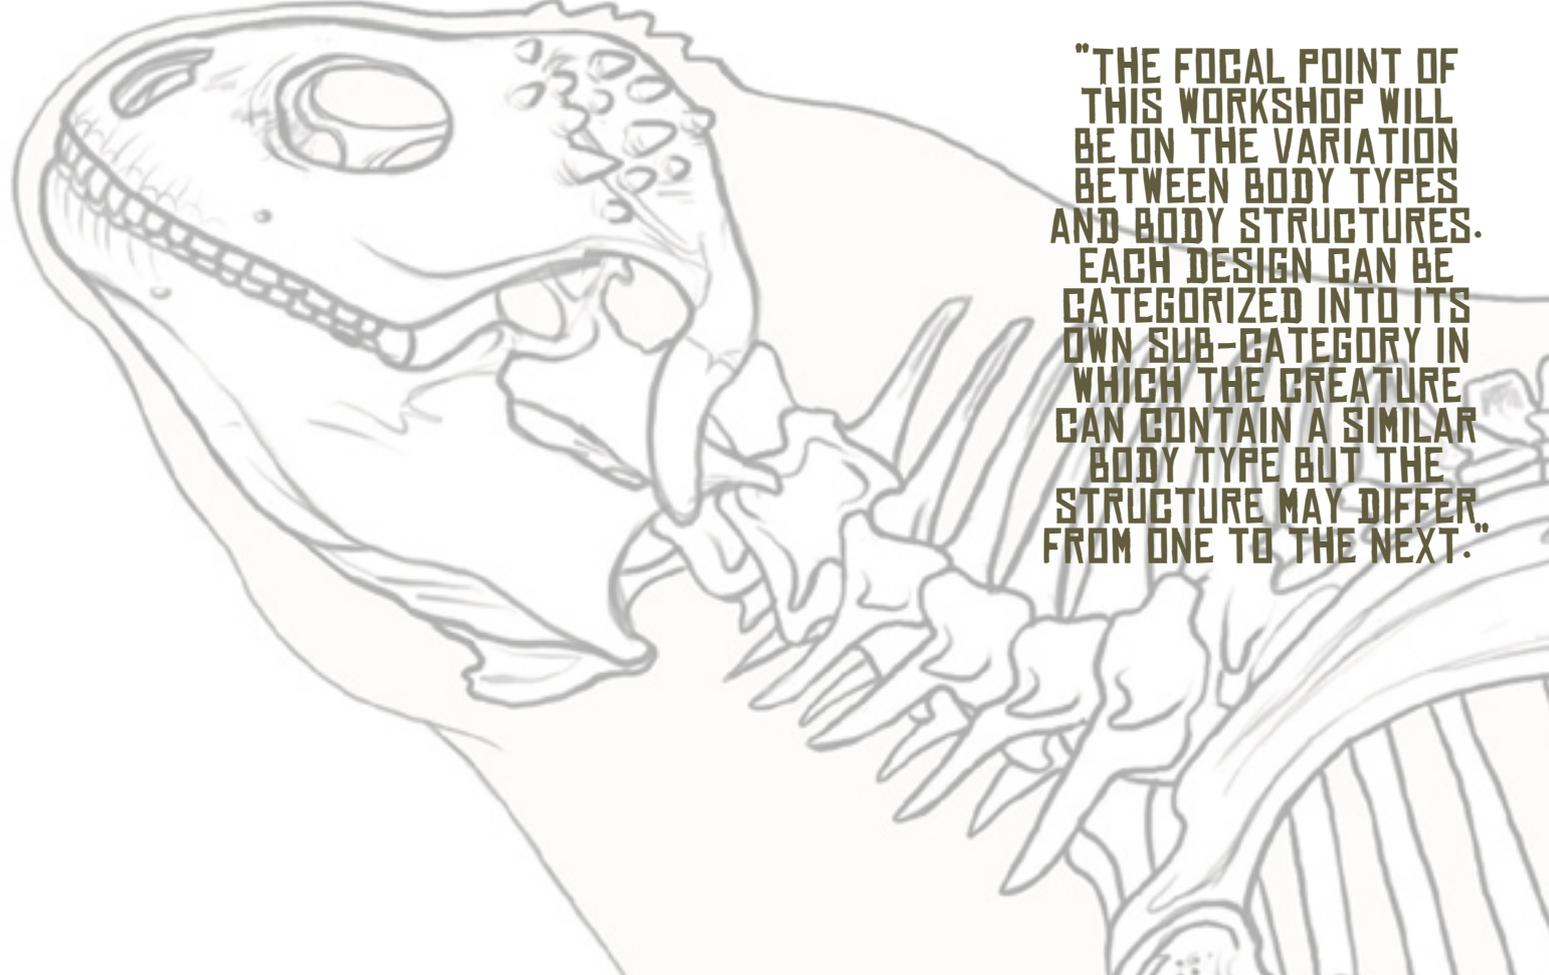

AnimationMentor.com is an 18-month online animation school for students who are serious about an animation career. The program is designed and taught by professionals, working at the top animation studios in the industry, focusing 100% on character animation. Our online campus is built with a production studio focus and provides a unique and special community of both students and instructors from all over the world who have one passion in common -- animation!

TINY LITTLE THINGS!"

A digital artwork featuring a lighthouse on a rocky, snow-dusted peak. The lighthouse has a glowing lantern at the top. A hot air balloon with a basket is floating in the sky above the lighthouse. The background is a dark, cloudy sky with a hint of a sunset or sunrise. The overall mood is atmospheric and dramatic.

BEACON TOWER

BEACON TOWER

CREATED IN:
Blender 2.48

INTRODUCTION

The goal of this tutorial is to show you how to create a simple lighthouse scene in Blender 2.48. We will be using a mix of modeling, texturing, and rendering techniques to create a scene that is both visually appealing and technically sound.

SKETCHING

Before we start modeling, it's important to have a clear idea of what we want to create. In this case, we'll be using a simple line drawing to define the basic shapes and proportions of the lighthouse.

BEACON TOWER

BLOCKING-IN

The first step in creating a scene is to block in the basic shapes and proportions. This involves creating simple geometric shapes that represent the main elements of the scene.

This is the final result of the scene. It shows a lighthouse on a rocky cliff with a hot air balloon in the sky. The scene is rendered in a stylized, painterly style.

BEACON TOWER

THE ROCK

The rock is the base of the lighthouse. It's a simple, blocky shape that provides a solid foundation for the tower. We'll be using a mix of modeling and texturing techniques to create a realistic-looking rock.

THE LIGHT

The light is the heart of the lighthouse. It's a simple, glowing sphere that provides the main source of light in the scene. We'll be using a mix of modeling and texturing techniques to create a realistic-looking light.

BEACON TOWER

THE TOWER + BALLOON

The tower and balloon are the main elements of the scene. We'll be using a mix of modeling and texturing techniques to create a realistic-looking tower and balloon.

NO CONTROL BY MARCEL BAUMANN

CONCEPT

Have you ever been in a situation where you weren't sure if it was real or just a dream? The character - in this case a boy - is finding himself in an extreme situation, a sleep gauge, from where there seems no escape. In the process he is caught at the moment where he is trying to break out of the dream, but at the same time he is still covering his face from the heat and brightness of the fire.

The air burner that breaks through the dream moves the character into a surreal world. He stops to believe that he can survive, but at the same time does not accept that what he is seeing is real. Most importantly, he refuses to accept that he will die. Because there is still the possibility that it is a nightmare, he tries to break out of his dream with all his mental will and is caught between the two worlds. He finds himself in the best of reality but simultaneously the fire of his nightmare is still surrounding him. The painting captures the very short moment of just a few seconds.

I follow the 'Control' in the title and as the name of the ship. Firstly it explains that we normally don't have control over what we are dreaming. But the captain who has full control over his burner and engine. It's like the earth is subtle and the burner in this moment is reaching the engine. This may be associated with the character's feelings, who is afraid of having reached the end of his world. In the complex moment he is the captain and the boy lying in the bed, all at the same time. The last point is just my interpretation of how I see my own work.

The feelings and experience in that very short moment of switching between these two worlds are the spectacular parts that I wanted to capture in the picture. I tried to integrate this idea into a spectacular visual impression of a dream to support the story and help the viewer feel the same emotions as the character.

The concept image (Fig. 01) shows how I developed the story and composition for the character. The viewpoint should be to see the side and coming the dream in an abstract way. I tried to capture different kinds of consciousness and it started quite abstractly. During the viewer's understanding of what is actually happening, I tried the rough style of the concept painting but tried to find something more spectacular, and something that the viewer could understand intuitively. Other concept pictures I made ended up like abstracts, but I didn't want to leave the main idea. I kept the bed but changed the camera angle, which is placed beneath the floor to create a dramatic and exaggerated feeling of space. I had other spectacular scenes in mind, including a ship crashing into a rock, but this was another concept altogether. I remembered a picture from a Disney movie, made some very rough pencil sketches, and then consisted of all the ideas into one composition that supported the story successfully.

3D MODEL

The next step was to build a rough 3D scene to find the correct perspective and to test the scale of the ship and the fire. I used the rendering as the background layer in Photoshop and started to paint over it (Fig. 02).

FANTASY

179

PAINTING

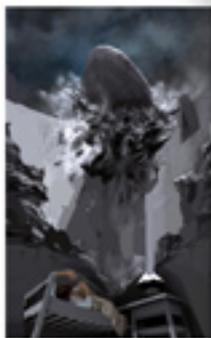

Started working in the gauge with the rocks, changing the size of the ship, flipping the bed to the other side, and then began to work again on the main composition and established the correct scale (Fig. 03).

I then created some simple custom brushes, with different particle sizes and different blur levels, to block in some ambient water effects. I added further fragments of the burning ship onto different layers and placed a photo of myself inside the bed. For the foreground I needed a more realistic quality than in the background. In order to separate the real world from the dream world I wanted to keep the foreground more realistic, in contrast to the background.

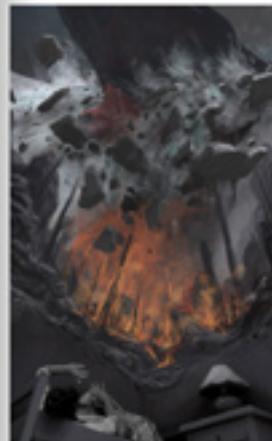

200

FANTASY

To save time, I painted over the photo and added new textures. I also added some new light directions and had to make them fit in with the general atmosphere. The idea that the bed from reality really was underground, but the viewer experiences reality and with the concept in an interesting way. The blue background of the sky is a photograph with some added details in the form of clouds that were painted with a custom-made cloud brush. I also like details and texture on the rough 3D model and the 3D helps to match the realism of the character and then replace the ship with a huge air burner strong enough to break the wall of the ship (Fig. 04). More

rocks with different brightness levels were then needed to create a sense of depth and distance.

On different layers I added more fragments and different water effects to get the feeling that the air burner was still moving forward (Fig. 05). The water shouldn't be the only nightmare, it should be followed by an air burner which would inevitably fall into the gauge. To make the scene nightmare complete, I surrounded the character with a burning forest, to make escape absolutely impossible (Fig. 06), which also serves in increasing the surreal nature of the picture. To make the fire more convincing, I set the fire also onto the bed, which was something that I questioned since when playing around with the water effects. The hope that the water may kill the fire and the possibility of burning is destroyed by the appearance of the character and moving character. On one hand it would be a nice idea if the dream was crazy enough to prevent the water extinguishing the fire. I used the same brushes for the fire as I used for the water.

For the final version I added lighting to the rocks, character, ship, and trees, and followed with some like effects in the water to create different degrees of motion. I used more detail, such as the two inconspicuous eyes in the water and stars on the ship, to emphasize the scale. The trees in the foreground create the feeling of protection, beside the hands of the character. They also help with the lighting, as they only 3D-painted scene and not with a further contrast in the heat of the fire and make the full of the whole scene more dynamic.

CONCLUSION

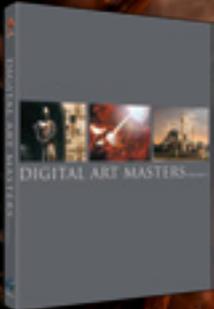

After finishing this scene, I was happy that I had tried to describe a more complex situation than in my other environmental pictures. I learned that the concept is the start of the painting, which is the most interesting and important part of creating a picture. Following that I often find a rougher and faster style of painting for my work.
